KENNEDALE ISD UPDATING HIGH SCHOOL AND JUNIOR HIGH TRACKS WITH CARTER CONSTRUCTION

Kennedale, TX - June 2018

Kennedale ISD – Construction underway on updates to the Wildcats high school and junior high school’s existing track and field event facilities. Updates will include removing and replacing existing structural spray using APT’s Spurtan BS System. Carter will install a green surface at the high school, and will install a black surface at the junior high.

Spurtan BS is an IAAF approved system, ideal for regional tracks and universities, spike resistant, and was developed for excellent force reduction. It is available in multiple colors.

“We are looking forward to improving these tracks and working with Superintendent Gary Dugger.” -Cynthia Carter, President

Carter has installed, resurfaced, and repaired hundreds of tracks over the last 20 years, and are an industry leader in athletic construction. Carter Construction will work with you to ensure you get the best product to fit your budget, whether you need a facility built from the ground up or updates to an existing facility.
